ACTIVITIES

Explain to Ls that you are going to play a floor board game. Arrange Ls to sit in a large circle on the floor in two groups. Put all the turnip cards of the board game (with the turnip facing up) on the floor at random in a circle. Give a counter (a small turnip) for both groups. The first group to throw a six starts the game. You can start the board game at any card. Ask Group 1 to throw the dice and to move the counter according to the number on the dice. Turn over the turnip card Group 1 landed on and explain the task to Ls. Ask them to perform the task together. If Ls can do their task successfully, they can keep the turnip card. If not, the turnip card stays on the floor. When Ls land on a turnip card like 'Miss a turn. / Miss two turns. / Throw the dice again. / You lose one turnip. The rabbit has eaten it. / You have pulled out a turnip. You get it.', they follow the instruction on it. Then take that card out of the game. Go on playing the game continuously landing on the remaining turnip cards down on the floor. The game is over when there are no more turnip cards on the floor. The group with the most turnip cards is the winner.
